

E-commerceApplication

Project Description

The e-commerce application helps to showcase your ability to build fully functional platforms using MERN Stack. Upon completion, you will be able to contribute to build and handle complex applications with extensive features.

Objectives

- The e-commerce application provides a platform as a functional online store with product listings and shopping carts.
- The users will be able to check out product listings and add them to their carts.
- The admin will be able to check out the orders and verify the products before placing orders.
- The sellers will be able to add their products details and mention the order details and stock details.

Features

- Only authenticated users can access the platform.
- The application will be accessible in Dark and Light Theme mode.
- Product Listings. Shopping Carts. Payment Gateway. Adding Reviews.
